Keyndicate With Key

The special keys indicator helps you to keep track of the special function keys (f1 to f12) and will flash in a random colour when a special key is pressed or released. Features: * Small and unobtrusive application icon * Special keys are displayed in a panel, which you can place anywhere on your desktop * Easily select between two different light states (green and red) * Ability to lock down the current state * Quick and easy to use * Allows customization of the colours and width of the blinking indicator * Support for desktop notification that will help you to not miss any important key * Stays always on top * Reminds you of the settings and locks the current state * Lightweight * Works on all versions of Windows from XP to Windows 10 20.02.2018

TrueAlerts For Android TrueAlerts is an app created to help users and businesses track their Apple Watch usage. TrueAlerts acts as an automated notification based counter of how often your Apple Watch is used. It will send out notifications, reminders and lists of usage details at specific times and the app can be accessed from your phone or Apple Watch. You can also enter reminders to yourself for when you want to make use of your Apple Watch. For every one minute of a watch activity that you complete, the app will send out a notification for up to four weeks. If you receive a notification and the Apple Watch isn't on your body, the app will remind you of the activity and send out a notification for up to four weeks. Key features: *

Automatically sends you notifications of how often you use your Apple Watch * Reminds you of upcoming activities * Automatically reports which watch face you are using, the time and date and even which wrist you have the Apple Watch on * Connects your data to your account * Supports all iOS devices that have Apple Watch (including Apple Watch 3 and Apple Watch Series 2) * Provides reports on how many notifications you received on your Apple Watch, whether they were read and whether they were shared or sent to Siri * Offers a range of custom options * Supports both Android and iOS * Includes a comprehensive FAQ section with answers to most common questions * The app doesn't collect or store any personal data and never sends it to third parties. * No ads What's New New features for TrueAlerts for Android include the ability to connect the app with your
